NISC Ranked 22nd in Annual Best Places to Work in IT Survey by Computerworld

Lake Saint Louis, Mo., June 21, 2010 – National Information Solutions Cooperative (NISC), a leading provider of information technology products and services to utilities and telecommunications organizations, has once again been listed by *Computerworld* magazine as one of the 100 best workplaces for IT professionals in the U.S. This year, NISC ranked 22 and this is the eighth time in nine years NISC has been recognized by the publication.

“We are certainly proud to be recognized by *Computerworld*,” said Vern Dosch, CEO and President of NISC. “It is important to consider what this award means to NISC Members and Customers. Being recognized as a great place to work means that we compete for and attract some of the best IT talent in the markets we serve.”

This honor is part of the weekly IT publication’s 17th annual Best Places to Work in IT survey, which was published in the June 21 issue of *Computerworld* and online at <http://www.computerworld.com>.

NISC ranked number 22 overall in the 2010 survey and number 3 among small businesses with less than 2,500 employees. The *Computerworld* “Best Places to Work in Technology” award is determined through an intensive review process. This process includes an anonymous survey, given to a company’s technology professionals, asking them to evaluate the company’s culture, perks, career development, training and more.

About NISC

NISC has facilities in both Lake Saint Louis, Mo. and Mandan, N.D. Between the two locations, NISC employs more than 780 professionals who develop and support advanced software solutions to electric utilities, rural telephone companies and Fortune 100/500 corporations throughout the United States. Additional information about NISC may be found at www.nisc.coop.

About Computerworld

Since 1994, *Computerworld*’s annual “Best Places to Work in IT” feature has ranked the top 100 work environments for technology professionals, based on a comprehensive questionnaire regarding company offerings in categories such as benefits, diversity, career development, training and retention. *Computerworld* is the leading source of technology news and information for IT influencers worldwide. *Computerworld*’s award-winning website www.computerworld.com, weekly publication, focused conference series and custom research forms the hub of the world’s largest (40+ edition) global IT media network.
