## NISC Selects New Vice Presidents of Utility and Engineering & Operations

*National Information Solutions Cooperative adds members to executive team*

**Mandan, N.D., June 24, 2009** – National Information Solutions Cooperative (NISC), a leading provider of information technology products and services, announces two new additions to its executive team. David Bonnett has been hired as NISC's Vice President of Utility Solutions and Todd Eisenhauer has been promoted to Vice President of Engineering and Operations Solutions.

Bonnett – former Vice President of Product Management with Aclara™ Software, a meter data management and customer analytics software application provider – brings 17 years experience in the utility and software industry where he worked with cooperatives, municipals, investor owned utilities and retailers. His experience, familiarity with NISC and the cooperative business model as well as his interpersonal skills, values and business ethics were all qualifications in this selection. One of Bonnett's initiatives is to help NISC Members/Customers further benefit from their Smart Grid and Advanced Metering Infrastructure (AMI) investments.

Todd Eisenhauer, former NISC Manager of Engineering and Operations in the utility division, was promoted to Vice President of Engineering and Operations Solutions. Eisenhauer's career with NISC started in Member Support, where he supported Members with NISC's first geographic information system (GIS). His support expertise expanded to other engineering applications, including NISC's outage management system (OMS) and Milsoft's WindMil Engineering Analysis application. As a support team lead, he directed support and service initiatives in the engineering division. Eisenhauer has managed Engineering and Operations in the utility division for the last three years.

"At this stage in my career, one of the most inspiring and gratifying aspects of my work is to see bright and dedicated employees contribute to the growth of this organization," said Vern Dosch, NISC President and CEO. "We are looking forward to having David and Todd – with their expertise and experience – work with the vice presidents group to plan for the future and set strategies for our organization."

### **About NISC**

NISC, the leading provider of information technology products and services to the utilities and telecommunications cooperative industries, provides integrated hardware and software solutions to Member-Owners across the nation. Built on the foundation of the cooperative business model, for over 40 years we've provided innovative solutions that continue to set the industry standard.

NISC has facilities in both Lake Saint Louis, Mo. and Mandan, N.D. and employs more than 760 professionals between the two locations. Additional information about NISC can be found at [www.nisc.coop](http://www.nisc.coop).
